INDICATIONS FOR USE

EcoVue® Sterile Ultrasound Gel may be used during ultrasound procedures on all patient populations where sterility is indicated or otherwise desired, or during procedures where cross-contamination is of concern.

DESCRIPTION

EcoVue® Sterile Ultrasound Gel is a sterile, non-irritating, non-sensitizing, non-staining and water-soluble scanning gel intended for use during sterile ultrasound procedures. The gel is an accessory used to couple sound waves between a patient and medical imaging equipment during ultrasound procedures in a healthcare setting. EcoVue® Sterile Ultrasound Gel may be used with all commercially available ultrasound devices.

CONTRAINDICATIONS

None.

WARNINGS

- If irritation occurs, discontinue use and consult a physician. **NOTICE:** Any serious incident that has occurred in relation to this device should be reported to HR Pharmaceuticals.
- EcoVue® Sterile Ultrasound Gel is intended for single-use only. Re-use could result in cross-contamination, risk of infection, or adverse reaction for the patient.
- **Caution:** Federal law restricts this device to sale by or on the order of a physician or medical practitioner

PRECAUTIONS

Discard and do not use EcoVue® Ultrasound Gel if package is damaged or opened.

PRE-USE, HANDLING & INSPECTION

- EcoVue® Sterile Ultrasound Gel should be thoroughly inspected prior to use to ensure packaging is not damaged or defective.
- To reduce the risk of cross-contamination, standard practices for sterile procedures should be used.

INSTRUCTIONS FOR USE

- Remove SafeWrap™ outer pouch (if applicable).
- Manually open the packet by tearing along the perforations where indicated.
- Apply the desired amount of EcoVue® directly to the patient or probe as needed.
- Discard packet after use.

RECOMMENDED STORAGE CONDITIONS

Store in a clean, dry place at room temperature (15° - 30°C; 59° - 86°F) and away from direct sunlight.

INDICATIONS FOR USE

EcoVue® Non-Sterile Ultrasound Gel Single-Use Packets are intended for use in facilities where cross-contamination is of concern on all patient populations during non-invasive ultrasound procedures on intact, unbroken skin.

DESCRIPTION

EcoVue® Non-Sterile Ultrasound Gel Single-Use Packets are non-sterile, non-irritating, non-sensitizing, non-staining and water-soluble gels intended for use as a scanning gel in diagnostic and therapeutic ultrasound gel procedures. The gel is an accessory used to couple sound waves between the patient and medical imaging equipment during ultrasound procedures in a healthcare setting. EcoVue® Non-Sterile Ultrasound Gel Single-Use Packets may be used with all commercially available ultrasound devices.

CONTRAINDICATIONS

None.

WARNINGS

- If irritation occurs, discontinue use and consult a physician. **NOTICE:** Any serious incident that has occurred in relation to this device should be reported to HR Pharmaceuticals.
- EcoVue® Non-Sterile Ultrasound Gel Single-Use Packets are intended for single-use only. Re-use could result in cross-contamination, risk of infection, or adverse reaction for the patient.
- **Caution:** Federal law restricts this device to sale by or on the order of a physician or medical practitioner.

PRECAUTIONS

Discard and do not use EcoVue® Ultrasound Gel Single-Use Packets if package is damaged or opened.

PRE-USE, HANDLING & INSPECTION

EcoVue® Non-Sterile Ultrasound Gel Single-Use Packets should be thoroughly inspected prior to use to ensure packaging is not damaged or defective.

INSTRUCTIONS FOR USE

- Manually open the EcoVue® Non-Sterile Ultrasound Gel Single-Use Packet by tearing along the perforations where indicated.
- Apply the desired amount of EcoVue® directly to the patient or probe as needed.
- Discard packet after use.

RECOMMENDED STORAGE CONDITIONS

Store in a clean, dry place at room temperature (15° - 30°C; 59° - 86°F) and away from direct sunlight.

INDICATIONS FOR USE

EcoVue® Non-Sterile Ultrasound Gel is intended for use in facilities where cross-contamination is of minimal concern on all patient populations during non-invasive ultrasound procedures on intact, unbroken skin.

DESCRIPTION

EcoVue® Non-Sterile Ultrasound Gel is a non-sterile, non-irritating, non-sensitizing, non-staining and water-soluble gel intended for use as a scanning gel in diagnostic and therapeutic ultrasound procedures. The gel is an accessory used to couple sound waves between the patient and medical imaging equipment during ultrasound procedures in a healthcare setting. EcoVue® Non-Sterile Ultrasound Gel may be used with all commercially available ultrasound devices.

CONTRAINDICATIONS

None.

WARNINGS

- If irritation occurs, discontinue use and consult a physician. **NOTICE:** Any serious incident that has occurred in relation to this device should be reported to HR Pharmaceuticals.
- **Caution:** Federal law restricts this device to sale by or on the order of a physician or medical practitioner.

PRECAUTIONS

- Discard and do not use EcoVue® Ultrasound Gel if package is damaged or opened, or if tamper-evident seal is damaged or missing (if applicable).
- Do not refill EcoVue® Ultrasound Gel multi-use products.

PRE-USE, HANDLING & INSPECTION

- EcoVue® Non-Sterile Ultrasound Gel should be thoroughly inspected prior to use to ensure packaging is not damaged or defective.
- For EcoVue® Non-Sterile Ultrasound Gel in the 250g FlexPac® (REF 285), visually inspect sides, bottom, and nozzle to ensure there is no gel leakage.

INSTRUCTIONS FOR USE

- Remove tamper-evident seal and replace cap (if applicable).
- Apply the desired amount of EcoVue® directly to the patient or probe as needed. To avoid contamination, tips of containers should not come in contact with patient, staff or instruments.
- Close cap and store in a suitable place. Discard container when empty (or sooner, if required by facility internal procedures).

RECOMMENDED STORAGE CONDITIONS

Store in a clean, dry place at room temperature (15° - 30°C; 59° - 86°F) and away from direct sunlight.
